MARZOTTO

GROUP

SUSTAINABILITY STATEMENT

FINANCIAL YEAR 2025

EXTRACT

WHO WE ARE

Marzotto is a **leading multinational industrial group in the textile sector,** with a long-standing tradition of producing high-quality fabrics, particularly wool and other natural fibres, for clothing and furnishings.

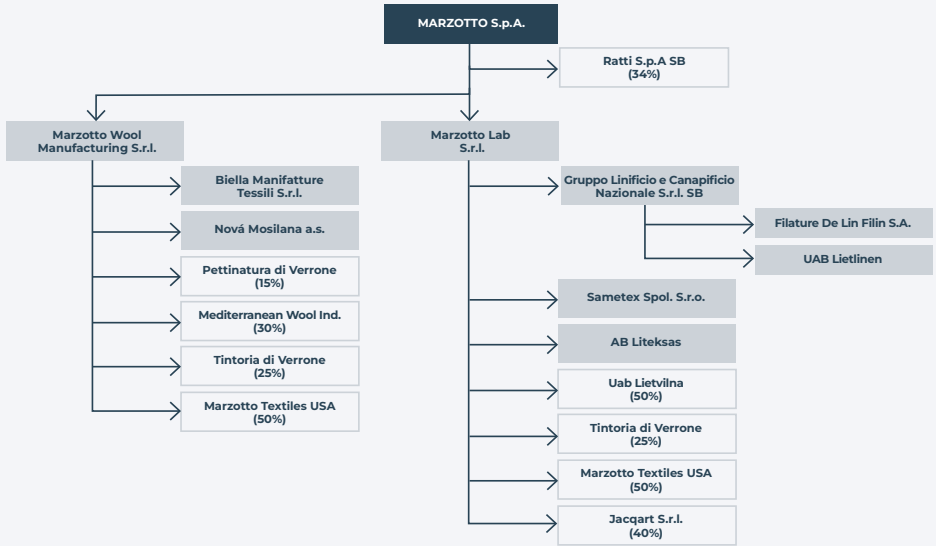

The value chain

Marzotto operates transparently and responsibly throughout the entire value chain, promoting ethical conduct both within the company and in its relationships with suppliers and customers. Raw material production is one of Marzotto's strengths: the Group **selects high-quality materials through established relationships with strategic suppliers worldwide,** in line with its sustainability values.

UPSTREAM	UPSTREAM DIRECT	DIRECT		DOWNSTREAM	
Raw-material generation	Purchase of textile raw materials	Design, research and development	Production of fabrics and yarns	Product packaging and sale	Product use and end of life

2,600 Tonnes Yarn sold

Business areas

MARZOTTO WOOL MANUFACTURING

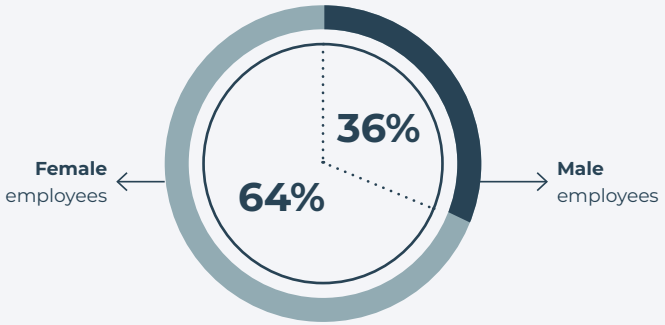

Production and distribution of wool fabrics for clothing:

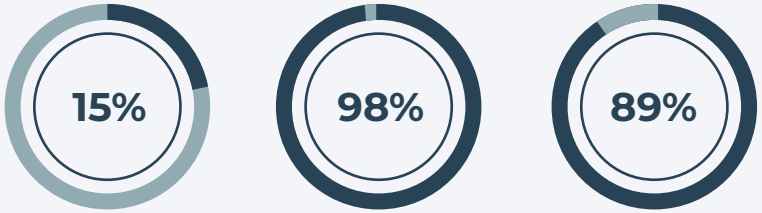

MARZOTTO LAB

Production and distribution of cotton fabrics, linen yarns and fabrics, and home textiles:

PEOPLE

Marzotto places people at the heart of its business. Their experience and specialist expertise are essential to creating value and achieving the Group's goals.

Employees **under 30**

Full-time employees

Employees on **permanent contracts**

For Marzotto, **technical skills, workplace safety and employment stability** play a key role in production quality and the resilience of the value chain. With this in mind, the Group is committed to:

- Ensuring **fair working conditions;**
- Promoting a corporate culture focused on **occupational health and safety** by investing in training, prevention and risk assessment;
- Promoting **professional development,** social dialogue and respect for human rights;
- Fostering **equal opportunities,** non-discrimination and inclusion;
- **Monitoring and mitigating social risks** associated with its operational activities;
- Investing in **training,** considered a key lever for innovation, the quality of production processes and long-term employment stability;
- Promoting **work–life balance.**

COMMUNITY

Since its beginnings, the Marzotto Group has paid particular attention to building **strong ties with local communities,** promoting initiatives that respond concretely to the social and economic needs of the areas in which it operates. A significant example of this commitment is the creation of the **"Social City"** of Valdagno (Vicenza), developed at the initiative of Gaetano Marzotto Jr. as a tangible expression of an industrial vision focused on collective well-being and the enhancement of the local area.

Close collaboration with the **"Fondazione Marzotto"** continues. Since 1959, the Foundation has worked to support local communities and improve residents' well-being by providing supplementary social services to Group employees and former employees, as well as to people living in communities where the Group is or has been present. These services include nurseries, preschools, after-school programmes, nursing homes, day centres for older people, and the "Marzotto" Village in Jesolo.

Today, this approach continues through **structured collaborations** with public institutions, schools, universities, cultural associations and volunteer organisations. Some of the initiatives **carried out by the Group in 2025:**

Marzotto historical textile archive	Reorganisation and planned opening of the historical Marzotto textile archive in Valdagno, with the aim of enhancing the company's textile heritage and making it more accessible
Collaboration with ITS Cosmo Valdagno	For the Fashion Sustainability Manager course, the Group provided classrooms for lessons and apartments for students requiring accommodation
Projects with IIS Marzotto Luzzatti in Valdagno	Established collaboration with the school, particularly with its Textile and Fashion course, through workshops, project work, guided visits and exchanges of ideas
Collaboration with IULM University	Product-launch project work enabling students to engage with a real-world case involving product innovation, brand and positioning
"Fabrica" exhibition	Participation in the touring exhibition promoted through Italian Embassies and Italian Cultural Institutes, dedicated to the history and innovation of Italian textile manufacturing
Book "Il canto dei telai"	Support for the launch of Livio Galla's book on textile heritage and the culture of craftsmanship, through online and offline communications and launch events in Schio (Vicenza) and at the Lanerossi store in Milan
Hosting students for placements and internships	Hosting secondary-school, ITS and university students for school-to-work learning programmes (PCTO), work placements and internships, to support educational guidance and the development of transferable skills

ENVIRONMENT

Marzotto aims to progressively improve the efficiency of its use of resources, particularly energy, and takes steps to **reduce the overall environmental impact of its operations,** measured in terms of its carbon footprint (tonnes of CO_2 equivalent).

The Group's **energy consumption** from renewable and non-renewable sources:

Non-renewable fuel consumption (MWh)	Natural gas	Diesel	Petrol	LPG	Total
2024	126,201	2,278	140	48	**128,667**
2025	126,811	1,965	104	52	**128,932**

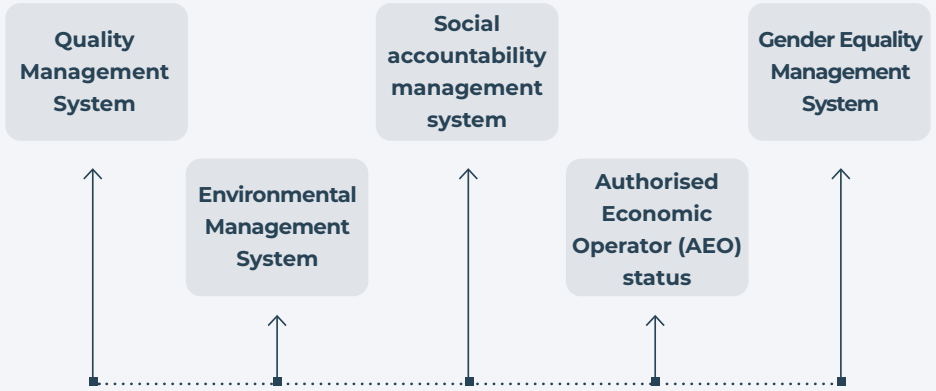

Electricity consumption (MWh)	Non-renewable	Renewable	Total
2024	41,875	30,557	**72,452**
2025	42,806	32,483	**75,289**

Greenhouse gas emissions (GHG – Scope 1 and Scope 2):

GHG emissions (tCO_2e)	Direct GHG emissions (Scope 1)					
	Natural gas	Diesel	Petrol	F-gas leakage	LPG	Total
2024	25,811	573	32	29	11	**26,456**
2025	26,297	525	28	41	12	**26,903**

GHG emissions (tCO_2e)	Indirect GHG emissions (Scope 2)		Direct and indirect GHG emissions	
	Electricity Location-based	Electricity Market-based	Scope 1+2 (Location-based)	Scope 1+2 (Market-based)
2024	25,077	26,218	51,533	52,674
2025	26,249	21,288	53,152	48,191

Management system certifications and other credentials*

Product certifications**

The Group recognises the importance of monitoring the supply chain in terms of **traceability, environmental sustainability and biodiversity protection.** To this end, it has established a system of certifications and controls.

* For the list of certified sites, please refer to the Sustainability Statement.
** For the list of certified products, please refer to the Sustainability Statement.
